Architecture

The architecture of the residence showcases a unique layout with spacious floor plans that mirror the comfort and privacy of a detached home, while the stylish façade combines modern materials and clean lines. With generous terraces extend the living space outdoors, Conali Residence offers residents breathtaking views of the surrounding area.

Minimal

Design

Minimalist design is about prioritizing the essential: natural light, environmental consciousness, timeless aesthetics, reliability and long term functionality.

Timeless

Aesthetics

Timeless aesthetics is about subtle lines, adaptability, and outlasting trends. Design stripped to its core function, realized using limited materials, neutral colors, simple forms, and avoiding extravagances to achieve a pure form of elegance.

Living Room

Conali Project

Our living room combines comfort and style in a bright, airy space. Featuring modern elements, high-quality materials, and an open design, it's perfect for relaxing and entertaining. Natural light and contemporary decor enhance the welcoming atmosphere, making it a great place to unwind or host friends and family.

GREEN Properties

Land Developers

GREEN Properties Land Developers is a privately owned and fully integrated real estate company based in Cyprus with offices also based in Athens, Thessaloniki and Crete. Making use of its extensive experience in real estate development, acquisitions, investments and constructions, the company oversees a portfolio of energy-efficient, modern buildings while delivering maximum quality and excellent design for a comfortable and happy life.

Our “GREEN” identity is present from the first stage of construction, responsibly using natural building materials, aiming to drastically reduce the environmental footprint through the adoption of energy efficient and renewable energy technologies.

Green Identity

The green philosophy that our company follows, can be found in all our projects.

Energy efficiency is improved, by taking advantage of all property orientations for natural light and installing a photovoltaic system with net metering for shared power.

Additionally, the installation of 10cm thick thermal façade throughout the property’s outer shell and the use of energy-efficient aluminum frames contribute to reducing energy loss and minimizing the environmental footprint.
